

Dear colleagues,

We are pleased to announce this year's HARPOON conference on new developments in precision oncology in Heidelberg, hosted by the German Cancer Research Center (DKFZ), the National Center for Tumor Diseases (NCT), and the German Cancer Consortium (DKTK):

DKFZ/NCT/DKTK HARPOON: HARmonization of Reporting in PrecisiOn ONcology.

Date: November 21 + 22, 2024

Venue: Heidelberg Congress Center, Czernyring 20, 69115 Heidelberg

Target audience: Everyone involved in multiomics-guided precision oncology and molecular tumor boards (bioinformaticians, data scientists, molecular biologists, pathologists, clinicians, clinical / medical trialists, patient advocates)

Content: The conference is intended to provide a platform for exchange and networking and to foster interaction between the One NCT, DKTK, and other networks. We expect highlight talks on precision oncology activities, including recent developments in multiomics data analysis (e.g., by artificial intelligence) as well as forward and reverse translation, underlining the central role of multidimensional tumor characterization as fuel for innovative clinical trials and scientific discovery in Germany and beyond.

We are honored to already announce that **Ulrik Lassen**, Head of the Department of Oncology, Centre for Cancer and Organ Diseases, Rigshospitalet, Denmark, will be one of our Keynote Speakers.

Registration: Please register via the following link, where you will also have the possibility to indicate flash talk topics you would like to present:

<https://indico.dkfz.de/e/harpoon2024>

We would be delighted if you could forward this announcement also to potentially interested colleagues.

Best wishes,

Your DKFZ/NCT/DKTK MASTER Team

Annika Baude-Müller
